

Portable Magnetic Yoke

1.General description:

This is the new generation of light weight,ergonomically designed yokes that improve job performance and productivity by reducing operator arm and wrist fatigue when testing in tight, confined and overhead areas.

2.Technial data:

Power supply	220V,AC , 1A
Extremely distance	0-150mm
Lifting power	≥5kg
Magnetizing current method	AC
The length of cable	3.0M
Size	250mm*180mm
Weight	2.42kg
Operating beat	It is suggested that in continuous long-time operation magnetization time ≤30 s and off time ≥30s
